Welcome to Jupyter!

find the time complexity of following pseudo code

for(i=1;i<=n;i=i*2) for(j=1;j<=1;j++) print("hello")

In [ ]:
```
ANS :  Here,there are two control statements which executes n no of times individually.So time complexity accounts
       to O(n)*O(n) =o(n^2)
```
